

CASE STUDY

David Smith, Principal
Blue Coat Church of England Academy

AT A GLANCE CHALLENGES

- Monitoring quality using old fashioned methods such as paper
- Linking all activities together
- Adapting a software to suit the in house culture

BENEFITS

- Everything in one central system
- Reduces the work load of staff members, therefore reducing costs
- Highly Adaptable

"...With SchooliP, everything is in one place and it is a workable solution..."

DAVID SMITH

Principal, Blue Coat Church of England Academy

OVERVIEW

Blue Coat Church of England Academy is located in Walsall, a market town in the county of West Midlands. Principal David Smith was looking for an electronic solution to appraise and provide quality assurance for the large number of staff in his secondary 900 student academy. He outlines his journey so far with our integrated performance management solution.

IMPACT

David stated "Monitoring quality in all aspects of the academy would be difficult without SchooliP. Old-fashioned methods such as paper and Microsoft Excel generate a lot of information, but they weren't easily accessible. With SchooliP, everything is in one place and it is a workable solution."

Phillip also added that "SchooliP has reduced workloads for some of our staff who no longer need to monitor an appraisal paper chase. By definition, costs are being saved."
