

CASE STUDY

Dr Christian Barkei, Principal
St George's International School

AT A GLANCE

CHALLENGES

- Lots of documentation across multiple sources
- Teachers workloads were very high

BENEFITS

- Improves schools processes
- Centralises key processes throughout the school
- Reduces workload across the school

"the data that we can generate out of SchooliP in a very simple and straightforward manner is really invaluable..."

DR CHRISTIAN BARKEI

Principal

St George's International School

OVERVIEW

St George's International school is an inclusive, vibrant international community of over 850 students aged from 3 years to 18+ years, representing over 60 different nationalities.

IMPACT

Dr Christian said "the data that we can generate out of SchooliP in a very simple and straightforward manner is really invaluable..." Previously, before we had an online system, we were doing things by hand effectively. Now, it takes us very little time, indeed, to generate meaningful reports, which are very, very helpful in terms of making decisions about where we can allocate resources."

He also went on to say "The IP suite supports strategic whole school and college curriculum area planning." following up with "It's not just a question of saying it's a system that, you know, the school wants you to use. It's a system that staff themselves can benefit from."
