

CASE STUDY

Mine Tana, Teaching Learning Development & Innovation Manager, Barnet & Southgate College

AT A GLANCE

PREVIOUS CHALLENGES

- Lots of different documents
- Stored on different platforms

CURRENT BENEFITS

- One platform to streamline processes
- Produces data for SLT to drive improvement
- Accountability for staff and management

OVERVIEW

Barnet and Southgate College is a further education college in North London, England. The current college was established in 2011. It has three main campuses and two other learning centres in the London Borough of Barnet and the London Borough of Enfield, predominantly serving over 14,000 students from these areas.

IMPACT

Our processes for continued professional development are now more clearly aligned in line with the Reflective Practitioner process which our staff use to reflect and develop their teaching practice.

CollegeiP has enabled us to evidence each stage of the staff development journey more effectively using the same platform and creating a much more smoother process for staff.

We are still in the early stages of using CollegeiP however their customer service and support at the time of need are excellent, and have enabled staff to transition over to the system confidently.

“CollegeiP has enabled us to evidence each stage of the staff development journey more effectively using the same platform and creating a much more smoother process for staff..”
